

ACE Portal

Tuesday, September 24, 2013

We'll be your window to the ACE Portal.

A commercial trade processing system developed by U.S. Customs and Border Protection, the ACE Portal is designed to serve as the window through which international traders can electronically provide all information needed by federal agencies for the import of cargo. As the capabilities of the ACE Portal continue to grow, it's increasingly important for you to familiarize yourself with the system and how it works.

With this in mind, MGTA offers a number of services related to the ACE Portal, including training on how to:

- Apply online
- Navigate the Portal
- Run reports on your import data, including ISF progress reports
- Add new users and administer cross account access
- Use the Portal's reference tools, such as antidumping/countervailing duty search
- Enroll and use Periodic Monthly Statements

[Contact us](#) today to book a training session with one of our consultants or learn more about our ACE Portal services.
